FOR IMMEDIATE RELEASE

La Cholla & Lambert Lane Construction Underway

Motorists encouraged to use extreme caution in area

ORO VALLEY, ARIZ (**August 28, 2007**) — Work on Oro Valley's first Regional Transportation Authority (RTA) project has begun at the intersection of La Cholla and Lambert Lane in Oro Valley. The project is expected to be completed by the end of the year.

Motorists are being asked to use extreme caution when traveling through the area. Currently the road in all four directions has been pulverized and paving will be occurring over the next month or so. Traffic controls and patterns will change throughout the project, and drivers are asked to be alert for lower speed restrictions and construction personnel. Avoidance of the intersection if possible is encouraged.
