

## Naranja Park Skate Park and Pump Track

The final design is complete! The skate park and pump track design efforts started in the summer of 2022. Design lead, Brad Siedlecki with Pillar Designs worked with this community and stakeholders, refining the design that will be another outstanding amenity at Naranja Park. The skate park features street elements as well as traditional elements that include a bowl, mini ramp, half pipe, and an OV logo for photos! The pump track features berms, rollers and great flow the provide for multiple transfers so riders can enjoy different loops. Both designs have roll-in entries for the beginner as well as more challenging features for those looking for adventure. The facility has a main concourse, will be lighted for evening use, as well as a restroom and water fountain. We anticipate it opening early 2024.
