Disclaimer: Numbers may show slight fluctuations when compared to previously published reports because of changes in the case data within the system due to normal adjustments. Although this data may change slightly, it is as accurate as it can during this time period. As of 2021, OVPD began transitioning to a new standard of crime data reporting. This implementation of the National Incident-Based Reporting System (NIBRS) provides a more accurate tally of crimes because of its ability to "provide circumstances and context for crimes...". Because NIBRS data is not available for the year 2020, these charts will be comparing our traditional way of tracking crime in 2020 to NIBRS for 2021 and beyond.

Based on further investigation and updating of information, actual classifications may change resulting in small variances in counts.

*DUIs are arrest counts, not citations counts, and may change like arrest figures do

* Traffic data delayed at least 30 days due to data entry backlog and may be updated with adjustments periodically
