

## Professional Tournament Groups and Their Basic Requirements

	MAXIMUM DISTANCE	MINIMUM # OF TARGETS	TARGET TYPE
<b>OUTDOOR</b>			
ASA	known & unknown distances out to 45 yards	20-30 <sup>a</sup>	3D
IBO	unmarked distances out to 50 yards	30	3D
NFAA	80 yards	14 (a 28-target course, but 14 targets can be shot twice)	field & 2D
USA Archery Field	60 meters	24	field
USA Archery FITA	70 & 90 meters	space available	target
<b>INDOOR</b>			
NFAA	20 yards	space available	target
USA Archery	18 meters	space available	target

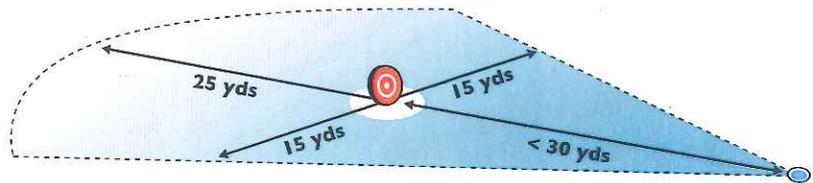

<sup>a</sup> State Qualifiers are 20 targets and State Championships are 30 (may use 15 twice for a State Championship)

### 6. What can I do to manage risk/liability?

#### Using space as a safety buffer

- For targets at distances less than 30 yards: Use a 15-yard safety buffer to the side and 25 yards beyond the targets.

- For shooting from 31 to 50 yards: Use a 25-yard safety buffer to the side and beyond the targets.

- For shooting distances longer than 50 yards: Use a 25-yard safety buffer to the side. Beyond the targets use a buffer that is half the distance of the longest target (for example: if the target is placed at 80 yards, the safety buffer should be 40 yards).
